INTERVIEW SUMMARY

Applicants wish to thank Examiner John Goodrow for the courtesies extended to Applicants' Representative at the interview held on March 7, 2005. At that time, Applicants' Representative explained that a crystalline polyester having the claimed combination of physical properties was not obvious over the references applied in the outstanding Office Action. The Examiner conceded that a binder resin for a toner containing a crystalline polyester having the specific number-average molecular weight and weight-average molecular weight physical properties, as presented claimed, was not obvious.
